

Yıldız Entegre

Captured the Award of “Fast Fish”

Yıldız Entegre, active in the field of forestry products for 4 generations, captured the award of “Fast Fish” with its turnover of TRY 1 billion. Yıldız Entegre continues to grow rapidly with its modern facilities, higher production capacity, investments in R&D, innovative products and quality. Yıldız Entegre, active in the field of forestry products for more than 100 years, is the best example for the attempt power and achievement grand of the Anatolian society. The success story, beginning with the wood board trading in the early 1890, turned out to an integrated facility based on consecutive investments.

Yıldız Entegre, having the largest MDF factory of the world in Kocaeli/Arslanbey, is the extension of this success story to present. Yıldız Entegre, manufactures MDF, Melamine Coated MDF, Laminate Parquet, Painted Parquet, MDF Profile, MDF Door, Doorskin, Backrest-Painted and Urea Formaldehyde Resins, Cover Profile and Impregnate Decoration Print in the forestry sector- at its existing facilities located on an area of 500,000 m². Yıldız Entegre is also among the largest companies in both local and global scale in each sector of activity. Yıldız Entegre, possessing the longest MDF press of the world, is the biggest MDF plant of our country with a MDF door production capacity of 3,500 m³/day.

Our Company, pushing the first 50 companies in the list of first 500 Larger Industrial Corporations, listed by Istanbul Chamber of Commerce and Industry. The Company pushes the first 50 in the listing of 500 larger industrial corporations of 2007, takes place in the 69th order of the first 500 companies in 2007. Yıldız Entegre, employing total 1250 persons, on the way to full integration, as it complements its name. Yıldız Entegre started to manufacture laminate parquet under the trademark of Varioclic and door under the trademark of Variodor in its manufacturing facilities at the beginning of 2004. Yıldız Entegre, making an important attempt in the laminate parquet sector and climbing to the summit within the shortest time with Varioclic, which offers livable floors to modern living spaces, realized the highest production capacity with Variodor in the door sector in industrial respect and became a popular and preferred name in the door sector. Yıldız Entegre, reaching international standards in laminate parquet and door production with Varioclic and Variodor trademarks, started to

manufacture MDF Profile under the trademark of Varioprofile. Yıldız Entegre, increasing its investments in the machinery park and product diversity, is widely known in the field of profile production. Upon development of the wooden furniture industry, the investment of facility for backrest-painted, as to be used as the back panel of the cabinets and cupboards was made to render services to Yıldız customers as of the end of 2007. Yıldız Entegre, in an uninterrupted progress on investments, completed another ring of the integration process with its investment of Impregnate Decoration Print in order to offer more qualified and diversified product range. Yıldız Entegre, a leader not only in the forestry products but also glue production, both satisfies the glue needs of the MDF facilities and makes sales to the other panel manufacturers with its existing 6 facilities. Yıldız Entegre, making investments so as to increase its product diversity, completed its investment of first panel door facility of Turkey in 2009. Thereby, it has the production capacity of 12 million panel doors per year.
